

May be installed with the following approvals to standardize fleet or to replace Nickel Cadmium

RG-380E/53 Series (24V, 53Ah)

# FAA STC SA01260WI Argentine STC CTS-0708.18(A) TCCA Acceptance ANAC STC 2010S04-07 EASA STC 10044950 INDIA Acceptance (B200)

- No modifications to the airframe
- Lower cost of acquisition
- Reduced maintenance fees
- Hazmat exempt shipping
- Fully recyclable

Made in the U.S.A.

## **Specifics:**

STC provides for the installation of Concorde sealed lead acid batteries that are direct replacements for the nickel-cadmium batteries originally installed in the aircraft. No modification of the aircraft is required to install the Concorde battery.

The Concorde RG-380E/K or L Series batteries offer the operator a choice of capabilities. RG-380E/K or L Series batteries all have the same footprint and are interchangeable, which allows the operator to choose the capacity required for the particular mission or a specific part number to standardize a fleet.

1. Some early and/or military aircraft may have installed a battery temperature monitoring system or alarm to satisfy an AD. No

battery temperature monitoring is required with Concorde VRSLA batteries because there is no threat of thermal runaway. Any battery temperature monitoring / alarm system may be removed or deactivated when a Concorde VRSLA battery is installed.

 Some battery boxes may have a fitment issue with "L" Series batteries. Please see this link for details: http://www.concordebattery.com/ otherpdf/CBC-SB-02092015-1.pdf.

The STC document package includes installation instructions and placard part number 6228.

This STC is available at no charge.
